DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 14-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Regarding the method claims, it is unclear what applicant intends to encompass by the current claim language. The preamble of claim 14 is directed to **a method of using** the toy travel clock, however limitations or steps listed after the preamble do not correlate. The method steps appear to be a method of how the device functions ^{internally} ~~externally~~ (or a method of work) instead of a method of using the device.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 1, 3, 5, 7 and 10 are rejected under 35 U.S.C. 103(a) as being unpatentable over '224 to Wako in view of '377 to Westerlage. Wako discloses a distance travel calculator configured to compute estimated distance traveled, and output device to display an indication of the estimated distance traveled

including a hypothetical route as recited in claims 1 and 2 (see fig 7), a storage module that stores at least one known destination having a known total distance wherein the input device is configured to accept a respective known destination (fig 13), as recited in claim 5, a clock displaying the current time (column 7 lines 32-34), as recited in claim 7 and coupled to a navigation system display, as recited in claim 10 (see locator map screen 62). Wako does not however specifically disclose an input device as claimed. Westerlage teaches the concept of having an input device for receiving destination information, including estimated time of arrival (column 10 lines 18-42). It would have been obvious to one having ordinary skill in the art at the time the invention was made to incorporate the input device of Westerlage with the device of Wako for the purpose of providing more helpful information to the driver.

Allowable Subject Matter

5. Claims 2,4,6,8,9,11-13 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
6. Claim 14 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.
7. Claims 15-18 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

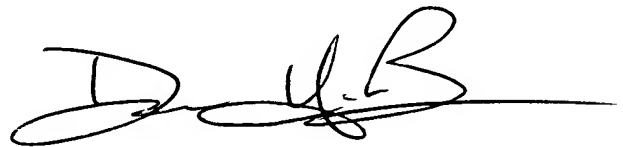

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. This is simply art of interest and was not used to reject any claims in this office action.
